Founder & Project Lead | PAPION

Tyre, Lebanon

March 2018 – September 2024

A Business Company specified in physical and digital design, including event planning, all forms of printing (wide format), Digital-made Laser Cut, graphic design, etc..

- Developed and deployed **PAPION Business System**, a custom web application tailored for the event decorations company, streamlining workflows and improving operational efficiency.
- Integrated eight inventories and distinct customer types, facilitating effective management of sales and expenses, with rich analytics on revenue and customer profiles.

- Led full-cycle project management from requirements gathering to deployment, enhancing business performance through technology.
- Designed branding and visual content using Adobe Photoshop and Illustrator, supporting marketing efforts and driving business visibility.
- Built a strong foundation in customer relations, business management, and problem-solving under tight deadlines.

Education

Bachelor of Science in Computer Science

Lebanese International University

Graduated 2023/2024

3.7/4 GPA

Projects

PAPION Business System

Tech Stack: React, Vite, Firebase, Bootstrap 5, Material UI

- A web application designed to streamline the workflow of an event decorations company, catering to the needs of all company members.
- Integrated eight inventories and various customer types, supporting different order types and providing comprehensive sales analytics.
- Key features include:
 - Insights on revenue, profit, and expenses with interactive charts.
 - Dynamic customer profiles and smart inventory management.

Twodo – Task & Project Management App

Tech Stack: MERN Stack, Tailwind CSS

- A todo and project management app focused on delivering a seamless user experience with a "one-click experience" philosophy.
- Allows users to manage projects collaboratively through email invitations, with roles assigned as editors or viewers.
- Key functionalities include:

- Easy project creation and task management with inline editing.
 - Online hosting with a GitHub repository for source access.
-

Coduction – Online Educational Platform

Tech Stack: React, PHP, Bootstrap, CSS

- An educational platform that guides students through coding career pathways while enabling mentors to create and share courses.
 - Features include:
 - Course creation interface with a markdown editor for detailed lesson structuring.
 - Students can explore different coding paths and enroll in courses.
 - Accessible via a GitHub repository.
 -
-

Auctions Web App – Real-Time Bidding Platform

Tech Stack: Python, Django

- An interactive web app allowing users to create, bid on, and track auction listings in real-time.
 - Core functionalities include:
 - User-generated listings with customizable details and a watchlist feature to track auctions.
 - Notifications for auction closures and winning bidders.
 - Hosted online with a GitHub repository for source access.
-
